design

Welcome

Kids by Design is built on a simple belief: children deserve beautiful spaces made just for them. Their home is where big ideas begin, little stories unfold and first steps are taken into the world. Designed in Australia and crafted from premium hardwoods and considered materials, our furniture is made with care for generations to come.

Oval Kitchen

For little chefs cooking up big feasts. The Oval Kitchen invites children to stir, chop, serve and imagine life at home in their own playful way. With curved edges, timber fluting and a beautiful bench-top, it brings warmth and style to any corner of the room.

Bake a pie in the oven, flip pancakes on the stove and wash up after a busy day of cooking. Just like in a real kitchen, little hands can twist knobs, open cupboards, pull handles and peek through the perspex oven window.

Cook up a storm in style. Our Fluted Kitchen brings texture, realism and charm to everyday roleplay. Crafted with ribbed European oak and fluted windows, it looks beautiful in the home while bringing endless hours of fun.

Every shopkeeper needs a special place to sell their best bits and pieces. Crafted from European oak with a ribbed texture that little hands will love, the Fluted Market Stand has three shelves for stocking produce, treats and treasures before the next customer arrives.

Arches

Fall in love with arched cabinets that bring soft curves and charm to the space. Display favourite books, loose parts and photo frames, creating an inviting corner where children can reach for what inspires them.

Crafted from natural European oak, each arch is an heirloom piece made to bring beauty and purpose to the room. Choose from open cupboards, perspex doors or fluted surfaces, with thoughtful design details that children can see and touch.

In calming sage tones, our arched shelves bring natural warmth to a child's space. Pair them with home corner kitchens as a playful pantry, ready to store utensils, pots, pans and the ingredients for today's imaginative menu.

Activity Table

Made for curious children excited to explore, the Activity Table gives them free rein over crayons, playdough, paint, sand and loose parts, with tall table edges that help keep the fun contained.

Perfect for the wonderfully messy moments children find themselves in. Bring the Activity Table outdoors to play with mud, sand, water, shells, pebbles and anything that can be dug up in the garden. With plenty of room for friends to gather around, it becomes a place for lasting memories.

Fluted Storage

As children run their hands along beautiful European oak panelling, the Fluted Storage adds a sensory touch to everyday spaces. Store books and baskets or display favourite artwork in tiered units that catch the light as it moves through the room.

Leni

Architectural, organic and made to inspire. The Leni storage range brings together flowing curves and nature-inspired shapes, crafted from sturdy European oak. Functional and beautiful, each piece naturally draws the eye.

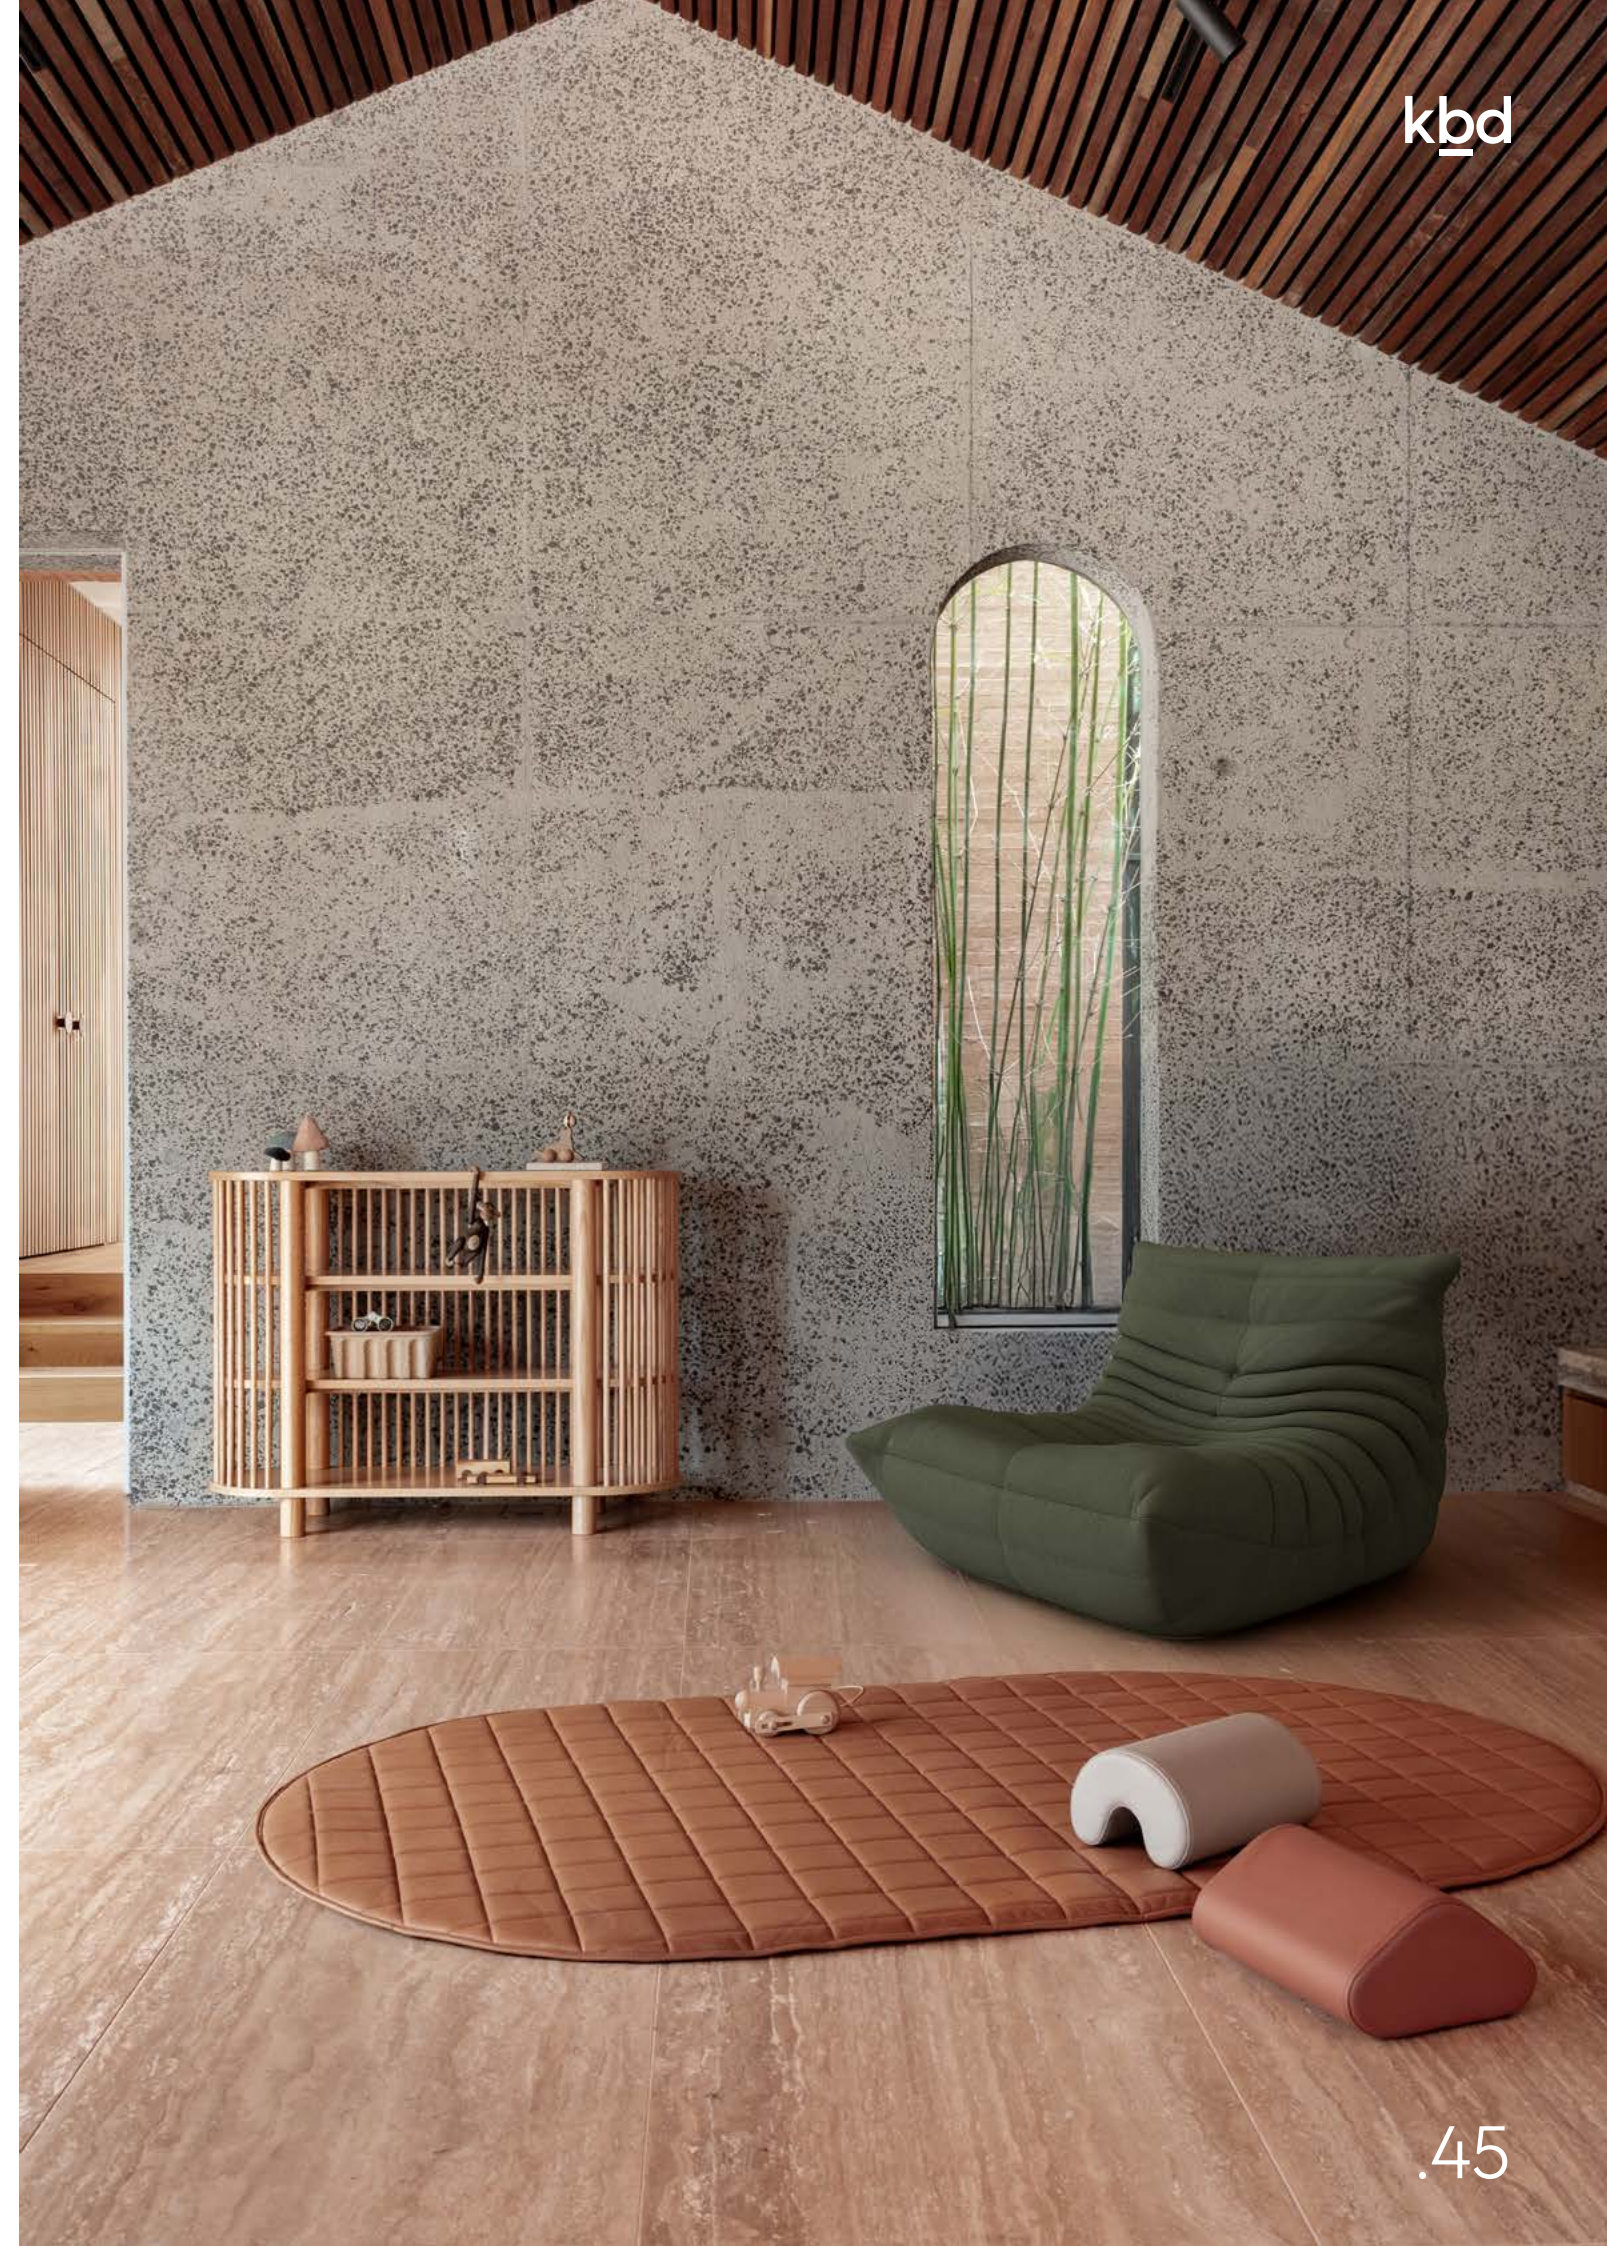

Snack time, story time, drawing time or “just one more game” time. Our chairs are made for the everyday moments of childhood. Crafted from durable hardwoods and inspired by timeless interiors, they bring comfort, style and a homely feel to children’s spaces.

Soho

Soft crushed velvet and a squishy place to sink into. The Soho Chair brings comfort and style to a child's room. Delivered vacuum packed and ready to expand, children will adore a cozy sofa that gives them space to rest and relax.

Little tables for little legs, ready for snack time, craft projects and afternoon-long tea parties. Crafted from beautiful natural materials, including European oak and European ash, each table brings warmth and texture to a child's play space.

Specially sized for the littlest explorers. Our infant tables, chairs, home corners and storage pieces help babies and toddlers move safely through their world. Crafted from calming natural materials, each piece supports crawling, climbing, reaching, discovering and those early moments of independence.

Get In Touch

From first steps to first stories, play kitchens to quiet reading corners, our furniture is made to become part of childhood's most memorable moments. Designed in Australia and made for children across the world, Kids by Design creates pieces that last through every stage of growing, learning and play.
